

## EDITORIAL

Dear Colleagues,

While presenting this second issue (volume 26) of Turkish Journal of Pathology in 2010, I would like to share some developments.

I would like to present the Journal's website for your consideration, and I expect your views and contribution.

We were pleased to hear that Turkish Journal of Pathology was accepted to "INDEX COPERNICUS" database in February, and to "Elsevier-SCOPUS" database at the end of May while we were getting ready for printing of this issue. I am glad to announce these pleasing information and wish to thank all contributed efforts, especially to Havva GÖKÇE M.D., and Burak BAHADIR M.D. Our next goal will be indexed in "Pubmed" and "SCI".

In March Turkish Journal of Pathology became a member of CrossRef, and included in DOI (*Digital Object Identifier*) system. By this means, articles published with DOI numbers will be easily accessible via internet. Henceforward, references in articles published in our Journal should be web-based. Thereby, citation in writing process will be evidential and rapid,

We are looking for your contribution to "Scientific Publishing" panel which will be held during the 20th National Congress of Pathology in Eskişehir Osmangazi University Congress Center between 29 September and 3 October.

With my best regards,

**Professor Şükrü Oğuz ÖZDAMAR, M.D.**  
Editor-in-Chief
