| 1-4 Nisan 2001 | Focus on Microscopy<br>Topic: This is a meeting in the successful series of interdisciplinary conferences on 3D image acquisition and 3D image processing. This series is an effective meeting point for developers and users of new techniques in 3D- , microscopy. Therefore, this conference will not only include new topics such as coherent anti-Stokes Raman spectroscopy, multi-photon excitation and time resolved micro-spectroscopy but it will also cover a wide range of applications in biology, medicine and material science. This year, there will be special attention for the issue: "Microscopy of living cells and tissues" as a reaction on the growing number of researchers that use GFP-techniques and life-cell imaging techniques for their experiments. | Sponsor: Royal Microscopical Society (Oxford, İNGİLTERE), Nederlandse Vereniging voor Microscopie (HOLLANDA), Koninklijke Academie voor Wetenschappen (HOLLANDA), PerkinElmer Life Sciences, University of Amsterdam<br>Location: Amsterdam, HOLLANDA<br>Interests: Biological Sciences |
